

# EGE DEMIR

Engineer specializing in agentic AI and training ML models  
demegire@gmail.com ♦ [demegire.github.io](https://demegire.github.io) ♦ +905326587242 ♦ Istanbul

## EDUCATION

---

**Middle East Technical University, Ankara** 2019 - 2023  
Bachelor of Industrial Engineering with a focus on Operations Research cGPA: 3.52/4.00

## PROFESSIONAL EXPERIENCE

---

**Emotion Machine** San Francisco, USA  
*Founding Engineer* November 2025 - Present

- First hire at a **Google backed** startup, building [tin.computer](https://tin.computer), an **autonomous growth agent** that takes over a SaaS and manages all its business functions - new features, analytics, bug fixes, customer support, paid acquisition, SEO, GEO and more, currently managing close to 100 businesses
- Lead the **agent-orchestration engine**: a manager agent that creates tasks and dispatches **fleets of parallel subagents**, verifies their output and communicates with the human stakeholder
- Also worked on the company side projects [Claw Messenger](#), which is the leading solution for giving iMessage lines to AI agents and [with.md](#) which is used for sharing markdown documents

**The Twin AI (Alias)** Nashville, USA  
*Founding Machine Learning Engineer* April 2024 - July 2025

- Worked on finetuning AI video models such as WAN on different styles and actions; cloning voices, lipsync, text2image, text2video, image2video, prompt enhancement
- Built a scalable generative ML API which served **10,000's of requests a day**
- Used Python, PyTorch, vLLM, Huggingface, Modal, Fal, Langchain, vector databases

**MyPeachAI** Seattle, USA  
*Founding Machine Learning Engineer* Oct 2023 - March 2024

- Created a **scalable** AI companion which served 100's of customers concurrently
- Aligned open source LLM's to ensure engaging and ethical conversations with AI companions, which **drove up engagement more than 50%** compared to base LLM's
- **Finetuned models** on humans likeness, achieving a high degree of resemblance
- Used Python, PyTorch, AWQ, vLLM, ComfyUI, Huggingface, Anyscale, Google Cloud, GCP

**Bueno** Los Angeles, USA  
*Part Time Machine Learning Engineer* Sep 2021 - May 2023

- Developed tools to aid artists, such as a model to extend the artists' artwork using their style by **finetuning Stable Diffusion**
- Developed the **frontend, backend, ML and cloud components** for these tools using Python, PyTorch, React, Typescript and Sagemaker

**Summarify** Istanbul, Turkey  
*Part Time Research Engineer* Dec 2020 - Sep 2021

- Developed **state of the art Turkish NLP models** for social media analysis.
- Created the best Turkish summarization algorithm to date by curating a novel dataset and finetuning mT5, which also **scored better than humans by ROUGE score**

## CONSULTING & PROJECTS

---

**Excurey**: consulting Excurey, building the legal rights infrastructure for human identity in AI generated content, on their human likeness cloning services

**Image Text Edit**: built a service for editing text in images with hundreds of daily active users

**Easy Site Plan**: built a service for creating site plans when building pools, fences, ADU's in US property

## VOLUNTARY WORK

---

**Middle East Technical University Artificial Intelligence Society**

Ankara, Turkey

*Co-founder*

*2020-2023*

- Cofounded ODTU YZT, a **college society to work on projects such as reproducing papers** and learn together by following courses, reading books and papers
- **Designed an introduction to AI course** and lectured to **100's of students** over eight weeks

**CodeFest**

Istanbul, Turkey

*Co-founder*

*2016-2019*

- Cofounded CodeFest, **the first high school level USACO-style coding competition** in Turkey with 300+ annual attendees

## SKILLS AND INTERESTS

---

**Tools**

Python, C++, Pytorch, AWS, GCP, Postgresql, Huggingface, ComfyUI, Typescript

**Languages**

Native Turkish, C2 English, B1 German

## ADDITIONAL COURSES

---

CENG501 - **Deep Learning**, reproduced "[Beyond Fully Connected Layers with Quaternions: Parametrization of Hypercomplex Multiplications with  \$1/n\$  Parameters](#)", ICLR 2021 AA, Middle East Technical University

CENG796 - **Deep Generative Models**, reproduced "[Drop the GAN: In Defense of Patches Nearest Neighbors as Single Image Generative Models](#)", CVPR 2022, AA, Middle East Technical University

**Introduction to Artificial Intelligence**, 1 year hands on program by Dr. Uzey Cetin in [KaVe](#)

**Machine Learning**, Stanford University (Coursera)
